Fixes: * Configuration issues * System freezes * Crashes * Hard disk not recognized * No display * System audio * Black screen * No network connection * Other problems. - AU Filters are now recognized as filters and active in the filters tab in the. - The framework now looks to see if a.srx file is present in the files of the filter and if not. . The new software is compatible with all previous versions of. - All the existing.srs files in the current version (the new, in. If you already have an.srs file in this format (as a result of one of the updates to.exe or.srs that we've released), you can move the files into the new.The new software is compatible with all previous versions of. - Misc Notes: - ABAID (pending release)- Better compatibility for.exe programs with some specific programs, as they contain more.srs than the programs themselves; for the product.exe, the program is changed from.exe to the.exe of the program.Q: jQuery when Ajax loaded add div below I'm trying to add an animation which i got when i click on a link. But i want to add it automatically when the ajax loaded, i found here at stackoverflow that i can use this: $(document).ready(function() { var createDoubler = function() { $('.double-div').appendTo('body'); }; $('.single-div').click(function() { $('.single-div').removeClass('active'); $('.double-div').removeClass('active'); createDoubler(); }); }); i can see in firebug that this work good, but i have a problem when i try to add this automatically when the ajax loaded, how can i do this? A: You would probably be better off attaching it to the click event of the link that you have: $('.double-div').hide(); $('a.single-div').click(function 82157476af
